BREAKING: 153 NATIONS ADOPT UN PANDEMIC DECLARATION
TO PUSH FAST-TRACKED VACCINES WITHIN 100 DAYS AND COMBAT ‘VACCINE HESITANCY’
U.S., ISRAEL & ARGENTINA VOTED NO
United Nations
A/81/L.6
General Assembly
Distr.: Limited
5 October 2026
Original: English
Eighty-first session
Agenda item 129
Global health and foreign policy
Draft resolution submitted by the President of the General Assembly
Political declaration on pandemic prevention, preparedness and response
15. Recognize that community protection, well-being, readiness and resilience must be at the centre of efforts to prepare for, prevent, respond to and recover from health emergencies, including through community engagement and social participation, workforce training, risk communication and infodemic management to guide priority actions;
23. Recognize the sovereign right of States over their biological resources and the importance of collective action to mitigate public health risks, and underscoring the importance of promoting the rapid and timely sharing of “materials and sequence information on pathogens with pandemic potential” and, on an equal footing, the rapid, timely, fair and equitable sharing of benefits arising from the sharing and/or utilization of Materials and sequence information on pathogens with pandemic potential for public health purposes;
37. Enhance multisectoral capacity, including through improving coordination and collaboration through a whole-of-government, whole-of-society approach at the national and community levels;
49. Promote investments in geographically diversified regional research and development and manufacturing capacities, as well as skills development and local production capacities with the aim of scaling up the availability of safe, quality, effective, equitable affordable and accessible vaccines, therapeutics and diagnostics within the first 100 days of a pandemic threat;
57. Take measures to counter and address the negative impacts of health-related misinformation, disinformation, including countering vaccine hesitancy and to foster trust in public health systems and authorities, by increasing public health education, literacy and awareness, including through the use of digital health tools;
INFODEMIC MANAGEMENT
INTERNATIONAL PATHOGEN SHARING
VACCINES WITHIN 100 DAYS
EXPANDED GLOBAL SURVEILLANCE
WHOLE-OF-GOVERNMENT, WHOLE-OF-SOCIETY
COUNTERING ‘VACCINE HESITANCY’
VACCINE HESITANCY IS NOT MISINFORMATION. SCIENTIFIC DISSENT IS NOT DISINFORMATION.

The dangerous UN declaration raises concerns that scientific censorship, lockdowns, and experimental vaccine mandates could be back on the table.

Nicolas Hulscher, MPH | substack.com/@nichulscher

On October 12, 2026, the United Nations General Assembly adopted a **new pandemic declaration**, with 153 countries voting in favor, three against, and two abstaining. The United States, Israel, and Argentina voted against the declaration.

VACCINES WITHIN 100 DAYS
EXPANDED GLOBAL SURVEILLANCE
WHOLE-OF-GOVERNMENT, WHOLE-OF-SOCIETY
COUNTERING 'VACCINE HESITANCY'
VACCINE HESITANCY IS NOT MISINFORMATION. SCIENTIFIC DISSENT IS NOT DISINFORMATION.

Buried within the **nine-page document** is a provision that should concern anyone who values scientific freedom, informed consent, and the right to question public-health authorities.

Paragraph 57 explicitly calls for governments to counter vaccine hesitancy as part of broader efforts against health-related "misinformation" and "disinformation."

The declaration goes even further, explicitly endorsing **"infodemic management"** and a **"whole-of-government, whole-of-society" pandemic response.**

This sounds like more scientific censorship, lockdowns, and experimental vaccine mandates.

The sweeping declaration also promotes:

- **VACCINES WITHIN 100 DAYS:** Scaling up vaccine, therapeutic, and diagnostic availability within the first 100 days of a pandemic threat, raising concerns about another Operation Warp Speed disaster.
- **EXPANDED GLOBAL SURVEILLANCE:** Strengthening disease-monitoring networks, early-warning systems, laboratory capacity, and digital health infrastructure, raising concerns about privacy breaches and oversight.
- **INTERNATIONAL PATHOGEN SHARING:** Promoting rapid sharing of potentially dangerous pathogen materials and genetic sequences across borders, raising concerns about biosafety.
- **BILLIONS IN PANDEMIC FUNDING:** Highlighting a $15 billion annual preparedness financing gap while encouraging expanded international funding, public-private partnerships, and support for the WHO.

- **SUPPORT FOR THE WHO PANDEMIC AGREEMENT:** Endorsing further negotiations to finalize the agreement's pathogen-sharing provisions and facilitate future signature and ratification.

The declaration is non-binding and does not itself authorize censorship, compulsory vaccination, or expanded WHO enforcement powers. However, it establishes a broad international policy agenda that seriously endangers health freedom.

Questioning a vaccine's safety, effectiveness, necessity, or long-term consequences is not misinformation. It is an essential part of scientific inquiry and informed medical decision-making. The scientific community must remain free to investigate adverse events, challenge regulatory decisions, publish contradictory findings, and question public-health policies without fear of retaliation.

Vaccine hesitancy is NOT misinformation.

Scientific dissent is NOT disinformation.

Questioning public-health authorities is NOT a threat to public health.

No international pandemic framework should undermine those fundamental principles. The Bio-Pharmaceutical Complex has already gotten away with the COVID [scam] disaster, and now they're trying to lock in the same playbook for their next global health emergency.
